Here you go. Yes, I will join the call at 2.

The Navy is the lead agency on the cleanup at the Hunters Point Naval Shipyard Superfund site and the California Department of Public Health is the lead agency for radiation scanning on Parcel A at The Shipyard development. EPA, along with its state regulatory agency partners, oversees and enforces Navy compliance with the Superfund law and other requirements to ensure the cleanup – including Parcel A scanning - protects human health and the environment.

During the Parcel A scanning process, CDPH discovered one Navy-related object, a deck marker (1-1/2 inch diameter), that was radiologically contaminated. EPA oversaw the immediate removal of the object. Due to its location and level of radiation, the object was not causing harm to residents or workers. However, the cleanup process for HPNS requires that any form of Navy-related contamination be cleaned up upon discovery (as opposed to other types of contamination, such as naturally occurring radiation in granite).

Based on our review of historical records, we did not anticipate finding Navy-related radiological contamination in this section of the site. EPA will work with the Navy to investigate how this contamination occurred and evaluate whether the site cleanup needs to be adjusted. EPA supports plans to make the scanning process at Parcel A more thorough -- including inside structures -- and completed on a faster timeline than originally planned.

EPA remains committed to ensuring that the Bayview-Hunters Point community is protected from exposure to radiation and that the Hunters Point Naval Shipyard Superfund site can be safely used for work, recreation, and residential purposes.

Thanks, Michele. Can you send me the desk statement ASAP?
Also – you should sit in on the Feinstein call later today with Brent and team.
Bill and I have a conflict at 2 p.m.
Thanks,
Kelly

Subject: RE: Legal review - desk statement - Navy planning on releasing statement today

Hi all –

I just got a call from Marvin Norman at the Navy. Steve Castleman with Golden Gate Law Clinic (who represents Greenaction) has already called Derek asking about the finding of the object on Parcel A. So someone has notified him and Greenaction, and we can expect that calls from media representatives will likely follow shortly. Given that, the Navy is planning on finalizing and releasing a statement “sooner rather than later” with the aim to get it on the website today instead of Friday.

Marvin said that he notified me but was not planning on affirmatively reaching out to anyone else. So we should probably notify the public affairs folks with the state and the City.

Thanks,

Brianna Fairbanks
